motor. Automatically activated by infrared sensor, the unit emits a generous hot air flow which passes through a very wide outlet hole located at the bottom of the dryer. Alisé offers a perfect balance between performance and aesthetic, for a very reasonable price. BRUSHLESS TECHNOLOGY - Alisé is operated by a brushless motor. This technology offers incredible efficiency and increased power delivery, resulting in less wear and increased longevity of the dryer. INSTANT HOT AIR - To offer a greater comfort in use, the dryer incorporates a heater that instantly warms the air during hand drying operations. AUTOMATIC ACTIVATION - Alisé automatically turns on when hands pass through the infrared sensors installed in the drying area. The touch-free automatic activation promotes hand hygiene, without the risk of cross-contamination. OVERHEATING PROTECTION - When infrared sensor is blocked for a long time, blower fan has a breakdown, or the dryer temperature exceeds safety limits, the overheating protection stops the dryer automatically. ULTRA QUIET - Emitting just 54 dB of sound while operating, Alisé is one of the quietest hand dryers currently available on market. A great choice for noise-sensitive environments such as small restaurants.
