HYGIENE SPECIALISTS

by MEDIAL

DOSICO IS OUR VISION OF SUSTAINABILITY.

A place where **sustainability takes shape**, where *experience, research and customisation* come together every day.

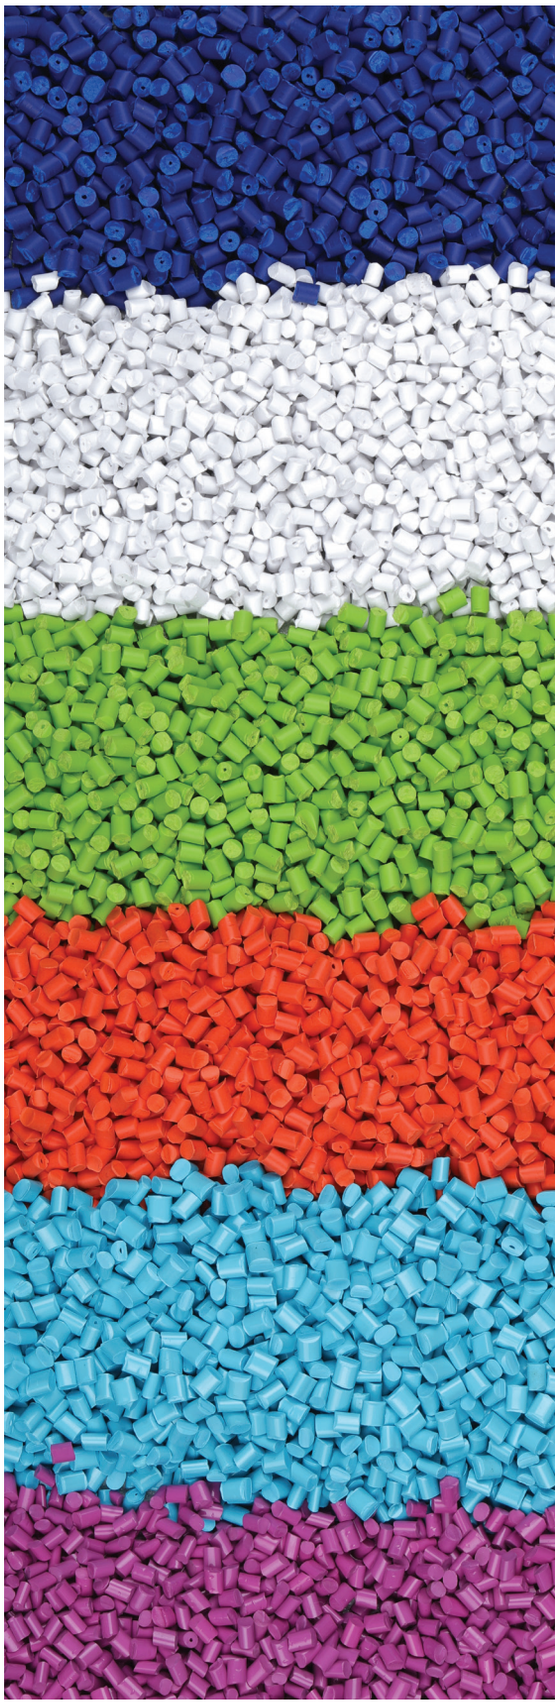

Design and production coexist within a single process: *recycled materials, accurate procedures and manufacturing culture* guide every solution we create.

This is how **our professional hygiene systems** are created: through responsibility, control and continuous evolution.

A constantly evolving journey that **strengthens our expertise and expands what we can create.**

"Because what we develop
is not simply plastic,
but a conscious choice
for the future."

FROM **MATERIAL** TO **SOLUTION**

Recycled materials, research and technical expertise accompany every stage of development, from material selection to product definition.

Every **DOSICO** solution is designed to integrate into contemporary environments through **surfaces, finishes and details** conceived to combine *functionality, aesthetics and recognisability.*

The possibility of **customising the front window with your own logo** also allows each dispenser to be adapted to the customer's identity and the space in which it is installed.

"Because design and functionality must evolve together."

A **MANUFACTURING CULTURE BUILT** OVER **TIME**

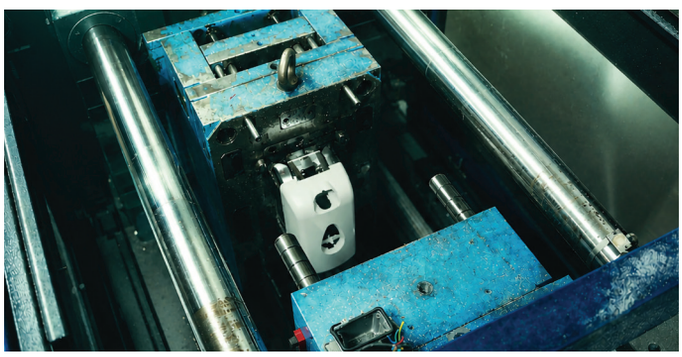

Founded in Spain in 1969 as a family business, DOSICO develops solutions for professional hygiene through a manufacturing culture built over time, where research, design and direct control of production come together in a contemporary approach.

Every solution is created through an internally developed process, in which **materials, moulding and finishes are carefully managed** at every stage of production.

Direct knowledge of materials and production technologies makes it possible to guarantee **consistent quality, reliability and attention to detail,** while maintaining a flexible approach focused on *product evolution*.

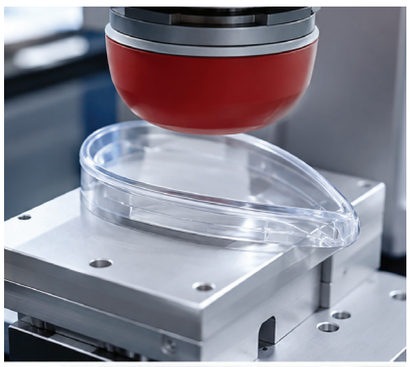

"Technical experience and manufacturing culture guide every design choice."

CUSTOMISATION AND **IDENTITY**

Every environment has **its own identity**, defined by *details, materials and visual language.*

For this reason, DOSICO offers the **possibility to customise the front window** of its dispensers through **pad printing**, allowing *logos, symbols or dedicated graphic elements* to be applied, making each product **unique and recognisable.**

A solution designed to integrate harmoniously into hospitality settings, professional environments and shared spaces, **transforming the dispenser into an element consistent with its surroundings.**

"Because even a detail can help define an environment."

SOLUTIONS FOR **PROFESSIONAL HYGIENE**

A **RANGE** DESIGNED TO **ADAPT** TO **EVERY ENVIRONMENT**

DOSICO develops **professional hygiene solutions** designed to **integrate into contemporary environments**, combining *functionality, aesthetic consistency and ease of use.*

The different lines share the same design approach: **recycled materials, direct control of production, attention to detail and customisation options.**

A range designed to adapt to hospitality settings, shared spaces, professional environments and high-traffic areas.

MATERIAL FOLLOWS THE FUNCTION

Professional hygiene requirements change according to different contexts.

DOSICO integrates different materials, **from recycled ABS to AISI 304 stainless steel, according to different usage requirements**.

Solutions designed to go beyond the washroom and find their place in environments such as **professional kitchens**.

LEGEND

Product feature symbols.

- Recycled Plastic
- Made in Europe
- Key lock system with key
- Screws included
- Level indicator window
- Folded Paper Towels (C, Z, M, V)
- Liquid soap (ml)
- Paper on a roll
- Interfolded paper
- PUSH System
- PULL System

STILEVO

100% RECYCLED PLASTIC

THE ESSENTIAL SUSTAINABLE CHOICE

The line in **100% recycled white ABS**, with polycarbonate inspection window.
Safety lock with key and screws included.

MEDIAL

KEEP IT CLEAN | KEEP ON CARING

AN INDUSTRIAL VISION BUILT ON SPECIALISED EXPERTISE

Within Medial, specialised manufacturing companies work side by side, developing professional solutions through different skills, materials and processes, united by a common vision.

dosico

HYGIENE SPECIALISTS by MEDIAL

DOSICO represents **expertise** in the world of **hygiene and recycled plastic solutions**, where *sustainability, design and customisation* come together in a contemporary manufacturing approach.

metalnova®

STEEL SPECIALISTS by MEDIAL

METALNOVA expresses its **know-how** in **steel processing** and **industrial metal manufacturing**, through processes focused on *precision, reliability and build quality.*

TWO COMPLEMENTARY MANUFACTURING IDENTITIES, SHARING THE SAME FOCUS ON RESEARCH, DEVELOPMENT AND DIRECT CONTROL OF PRODUCTION.
